O MNE

I am a young creative focused on UX/UI design, frontend development, and startup innovation.

Every day, I strive to improve by 1% — both technically and personally. I enjoy creating digital products that have a real impact.

I have worked on several startups, from initial concept to production deployment.

With one of these projects, I had the opportunity to join the international startup community in the USA, where I gained experience with global trends and approaches to product development.

Lucas Ligas

EXPERIENCE

UI/UX Consultant — Košický samosprávny kraj

Remote | 02/2025 – present

- Consulted and reviewed the user experience of a new regional development portal.
- Collaborated with the vendor to optimize user flows and information architecture.
- Ensured deliverables met client requirements and public sector standards.
- Proposed improvements for accessibility (UX accessibility) and modern design language.

Co-Founder — Incomodum

Bratislava | 09/2020 – present | www.incomodum.com

- Co-founded and led a startup team focused on digital solutions.
- Led teams to 5 winning hackathon projects (Hacknime.to).
- Developed the frontend for a national project for MIRRI SR — from prototype to production (navody.slovensko.sk).
- Designed UI/UX and conducted user testing for internal and commercial projects.
- Managed project workflows, team coordination, and presentations to juries and investors.
- Fostered team culture and mentored members in design and development.

Skills gained: leadership, client communication, design thinking, rapid idea validation.

Web Developer & Designer — Wezeo s.r.o.

Bratislava | 02/2021 – 02/2025 | www.wezeo.com

- Developed modern web applications for clients across various sectors (startups, e-commerce, services).
- Built responsive frontends using Next.js, React, Vue.js, integrated with backend APIs.
- Prepared design assets in Figma, created UI components and wireframes.
- Designed graphics for marketing campaigns — banners, visuals, and brand identity.
- Collaborated with developers and designers to implement a consistent design system.

Skills gained: teamwork in agile environments, UX optimization.

TECHNICAL SKILLS

- Frontend: HTML5, TailwindCSS, JavaScript (ES6+), React, Next.js, Vue.js
- Design: Figma, Adobe Photoshop, Adobe Illustrator
- Methodologies: Design Thinking, Agile, Scrum
- Soft Skills: Leadership, teamwork, presentations, creative problem-solving
- Other: Basic UX research, prototyping, web performance optimization

PROJECTS

Návody Slovensko *(Frontend Development, Idea creation)*
Official government web app providing detailed guides for Slovaks on everyday situations.

Košický rozvojový portál *(UI UX Consulting, Idea creation)*
Regional platform attracting domestic and foreign investors to Košice and supporting sustainable growth.

Incomodum *(UI UX, Branding)*
Modern and responsive website for a software company, highlighting its services.

SelfGrow *(UI UX, Branding, Development)*
AI-driven platform for personal growth, goal sharing, and connecting motivated individuals.

VirtuFest *(Product Design, Team Leader)*
Web app for festival management, stall reservations, and event organization. 2nd place at a hackathon in Revúca.

Športuj Too *(UI UX, Product Design, Team Leader)*
Mobile app for booking sports facilities in Petržalka; winner of hackathon for Petržalka.

Traffi *(Branding, Team Leader)*
AI integration for traffic optimization in Trnava; 2nd place at a hackathon for Trnava.
